

Youredi Introduces a Groundbreaking Solution: Carrier Emission Report Connectivity

Las Vegas, United States, February 6th, 2024 – Youredi, a leading provider of fully managed data integration services and connectivity solutions for logistics and the global supply chain, announces the launch of its innovative Carrier Emission Report Connectivity solution. This solution caters to logistics service providers, logistics service buyers, and LogTech software providers by offering them direct connectivity with carriers to access actual carbon emission data for their shipments.

In response to the global imperative for environmental responsibility, shippers around the world are actively seeking ways to reduce their carbon footprint. Thus, many shippers have started to demand actual CO2 emission data from the partners they work with. Youredi's Carrier Emission Report Connectivity enables businesses to enhance their emission reporting capabilities and ensure a bright future for their operations. Whether you are a logistics service provider, logistics service buyer, or LogTech software provider, our solution is the key.

"The days of relying on historical or industry average data for calculating freight carbon footprints are numbered. More and more shippers are demanding a higher standard, and that is actual data received directly from carriers. Our Carrier Emission Report Connectivity positions businesses to meet these elevated requirements and remain competitive in the market," said Jaakko Elovaara, CEO at Youredi.
