

DCL Logistics and FlavorCloud Announce Strategic Partnership to Transform Global DTC and B2B Logistics

[DCL Logistics](#), a leading third-party logistics (3PL) provider with over 40 years of expertise in fulfillment for high-growth brands, has partnered with [FlavorCloud](#), the global shipping SaaS platform enabling seamless cross-border DTC and B2B shipments from anywhere to anywhere in the world.

This collaboration addresses the challenges of rapidly expanding global eCommerce, which continues to outpace domestic growth. For DCL's merchants, navigating customs, compliance, and multi-carrier complexities has become increasingly daunting, especially with new regulations like [Mexico's December revised tariffs](#), new customs infrastructure to ensure compliance like Canada's CARM system, and the rising protectionist geopolitical voices from world Trump and others.

By integrating FlavorCloud's cutting-edge cross-border logistics platform, DCL offers merchants a simplified, scalable solution to unlock global commerce for DTC and B2B in 220 countries worldwide. FlavorCloud offers guaranteed DDP, full shipment visibility, and a single invoice for all global shipments, whether it is DTC parcels or B2B freight. In fact, their B2B DDP guaranteed anywhere to anywhere is the first service of its kind in market. Powered by a best-in-class customs and compliance network, FlavorCloud ensures fully compliant imports and exports while assuming all duties, taxes, and associated risks.

"As someone that has worked with multiple international logistics providers over the years, Flavorcloud's product capabilities fill a much-needed gap in the market. The ability to manage both DTC and B2B international parcel needs, with a single provider, is valuable. Frankly, there is no other B2B DDP guaranteed service like theirs. Their team deeply understands the cross-border logistics value chain and leverages technology and data to abstract all the risk and complexity for merchants so they can fulfill orders with guaranteed costs." [Shawn Compton](#), VP of Transportation at DCL Logistics.

Together, DCL Logistics and FlavorCloud are redefining global shipping for merchants, making international growth as seamless and predictable as domestic fulfillment. This partnership underscores their shared commitment to innovation, operational excellence, and empowering brands to thrive in the global marketplace.

"DCL is a leader in helping their merchants grow globally and we are a proud partner to accelerate this growth by removing risk and complexity from checkout through delivery." [Rathna Sharad](#), Co-Founder and CEO of FlavorCloud

ABOUT DCL LOGISTICS

DCL Logistics is a modern 3PL with over 40 years of operational expertise. We provide turnkey ecommerce and retail fulfillment services for brands looking to scale their business without
