

Turn Documents Into Data, Instantly

Introducing Flows by super.AI

Manual document processing is slow, error-prone, and resource-intensive, hindering business efficiency and decision-making. Flows by super.AI solves this by transforming unstructured documents into actionable data with unparalleled precision and speed.

Agentic Advantage

Automate complex tasks with AI-powered agents that learn and adapt.

Harmonious Integration

Seamlessly connect with existing systems and data sources.

Auditable Truth

Maintain transparency and trust with verifiable data trails.

Intelligent Workflow Builder

Design and deploy custom AI workflows with a no-code interface. Drag-and-drop components to extract, transform, and route data from any document.

Hi nitish@super.ai, welcome to your Super.AI Intelligent Workflow Builder

What Can I help you with?

Ask me anything...

Get started with our templates.

Classify and Structure Documents

Handles diverse document types through a comprehensive four-stage workflow: upload, classify, extract, and validate data...

[Details](#) [Use this template →](#)

Email-to-Order Processing Flow

Automated purchase order validation workflow that ensures accuracy and compliance in procurement processes.

[Details](#) [Use this template →](#)

Supply Chain Analysis

Upload and process multiple supply chain documents (Bills of Lading, invoices, delivery certificates, customs forms) in ...

Next-Generation Intelligence & Real Results

Agentic Workflow Builder

AI agents autonomously design and deploy document workflows from natural language.

Real-Time Validation

Instantaneous verification of extracted data ensures accuracy and compliance.

Multi-Model Orchestration

Intelligently combines the best AI models for each task, optimizing performance.

Continuous Accuracy

Workflows learn and adapt, consistently improving data extraction over time.

Industry Impact

- **Logistics & Supply Chain:** Streamline freight document processing, reducing delays and errors in global supply chains.
- **FinServ:** Accelerate loan applications and compliance checks with automated document verification.
- **Insurance:** Automate claims processing from diverse documents, speeding up payouts and reducing administrative burden.
